Subject Index

Canadian Journal of Soil Science, Volume 88, 2008

- Acidic soils
nitrous oxide emissions and soil mineral nitrogen status, 145
- Aeration
fertilizer nitrogen effects on N₂O emissions, 229
nitrous oxide emissions from corn, 189
- Aggregate stability
mechanisms of aggregate slaking process during rapid wetting, 85
- Aggregation
tillage and crop rotation on soil properties, 273
- Agricultural soil
cation binding in agricultural soil, 749
soil management effects on soil nematode population, 115
- Agricultural adaptation
modelling N leaching under climate change, 61
- Agroecosystem
carbon sequestration in Canadian ecoregions using ICBM, 451
- Agronomic practices
Alberta's agricultural soil benchmark sites, 399
- Alfalfa
emissions from irrigated cropping systems, 207
- Ammonia
ammonia emission from dairy cow manure, 611
ammonia volatilization following application of pig slurry, 585
nitrogen source effects on N₂O emissions, 219
nitrous oxide and odour reduction from swine manure, 571
- Analysis methods
time and measurement methods influence soil tests, 733
- ANN model
model prediction of soil drainage classes, 787
- Apparent soil electrical conductivity
environmental losses of nitrogen in potato production, 813
- Apparent dielectric permittivity
permittivity in a fibric limnic humisol, 79
- Application method
ammonia volatilization following application of pig slurry, 585
- Arbuscular mycorrhizae
mycorrhizae on soil P dynamics and corn P nutrition, 283
- Artificial neural network model
model prediction of soil drainage classes, 787
- Autotrophic
soil respiration components in poplar plantations, 261
- Avena sativa* L.
Ni toxicity thresholds for oat in four soils, 389
- Barley
effect of preceding crop on yield and soil properties, 553
- Barley straw
soil aeration, nitrate and carbon effects on N₂O emissions, 133
- Bigleaf maple
bigleaf maple influence on forest floor, 295
- Biological activity, soil
carbon sequestration in Canadian ecoregions using ICBM, 451
- Biosolids
inorganic and organic P elution from soil columns, 709
- Broadleaf species
bigleaf maple influence on forest floor, 295
- Bromide tracer
qualitative soil-landscape effects on a bromide tracer, 477
quantitative soil-landscape effects on a bromide tracer, 491
- Bulk density
carbon, organic matter and bulk density relationships, 315
field capacity and permanent wilting estimation, 761
silvicultural thinning changes soil physical properties, 849
- tillage and crop rotation on soil properties, 273
use of in situ volumetric water content at field capacity, 533
- Calcareous soils
evaluation of P retention equations, 327
- Carbon
stratifying soils for soil C modeling, 501
- δCarbon-13 techniques
distribution of C in soil humic fractions as affected by tillage, 99
- Carbon availability
nitrous oxide emissions from barley, 197
nitrous oxide emissions from corn, 189
soil aeration, nitrate and carbon effects on N₂O emissions, 133
- Carbon capacity
critical organic carbon content, 775
- Carbon change factors
Canada carbon change factors, 671
- Carbon cycle
carbon dioxide emissions by urban turfgrass areas, 529
- Carbon dioxide
carbon dioxide emissions by urban turfgrass areas, 529
emissions from irrigated cropping systems, 207
- Carbon dioxide exchange
carbon dioxide emissions by urban turfgrass areas, 529
- Carbon dioxide flux
carbon dynamics in arctic soils, 31
- Carbon fractionation
carbon dynamics in arctic soils, 31
- Carbon inputs, annual
carbon sequestration in Canadian ecoregions using ICBM, 451
- Carbon, native
distribution of C in soil humic fractions as affected by tillage, 99
- Carbon, organic
carbon change factors, 671
carbon dynamics in arctic soils, 31

- carbon, organic matter and bulk density relationships, 315
- changes in soil quality, 409
- critical organic carbon content, 775
- organic carbon in a sandy-loam soil, 443
- soil resistance under grazed intermediate wheatgrass, 833
- Carbon sequestration
 - carbon sequestration in Canadian ecoregions using ICBM, 451
 - critical organic carbon content, 775
- Catena
 - Alberta's agricultural soil benchmark sites, 399
- Cation binding
 - cation binding in agricultural soil, 749
- Cattle
 - ammonia emission from dairy cow manure, 611
- Census of agriculture
 - manure and fertilizer nitrogen application rates, 619
- Chronosequence
 - soil respiration components in poplar plantations, 26
- Clam
 - evaluation of clam shells as liming material, 559
- Climate
 - carbon sequestration in Canadian ecoregions using ICBM, 451
- Climate change
 - carbon dynamics in arctic soils, 31
 - climate change impacts on grazing capacity, 595
 - modelling N leaching under climate change, 61
- Clover, red
 - effect of preceding crop on yield and soil properties, 553
 - soil aeration, nitrate and carbon effects on N₂O emissions, 133
- Compost
 - changes during feedlot manure composting, 45
- Composted cattle manure
 - organic carbon in a sandy-loam soil, 443
- Conservation tillage
 - tillage, P fertilization and soil microbial biomass, 21
- Contamination, water
 - modelling N leaching under climate change, 61
- Conventional tillage
 - tillage, P fertilization and soil microbial biomass, 21
- Coprogenic soil
 - permittivity in a fibric limnic humisol, 79
- Corn
 - mycorrhizae on soil P dynamics and corn P nutrition, 283
 - nitrous oxide emissions from corn, 189
 - tillage effects on N₂O emission, 153
- Corn silage
 - organic carbon in a sandy-loam soil, 443
- Corn-derived C
 - distribution of C in soil humic fractions as affected by tillage, 99
- Cress
 - evaluation of clam shells as liming material, 559
- Crop residue
 - emissions from corn, soybean and wheat, 163
- Crop rotation
 - N mineralization in Canadian prairies, 681
 - tillage and crop rotation on soil properties, 273
- Cropping intensity
 - Canada carbon change factors, 671
- Dairy
 - ammonia emission from dairy cow manure, 611
- Dairy industry
 - Canadian dairy and industry GHG emission trends, 629
- Dairy manure
 - spring thaw and growing season N₂O emissions, 241
- Digital elevation model
 - model prediction of soil drainage classes, 787
- Denitrification
 - emissions from corn, soybean and wheat, 163
 - fertilizer nitrogen effects on N₂O emissions, 229
 - nitrous oxide emissions from barley, 197
 - nitrous oxide emissions from corn, 189
 - soil aeration, nitrate and carbon effects on N₂O emissions, 133
- Dielectric permittivity
 - permittivity in a fibric limnic humisol, 79
- Digital terrain model
 - quantitative soil-landscape effects on a bromide tracer, 491
- Dispersion model
 - ammonia emission from dairy cow manure, 611
- Disturbance
 - soil management effects on soil nematode population, 115
- DNDC
 - models to estimate N₂O emissions in Eastern Canada, 251
- Drainage
 - model prediction of soil drainage classes, 787
- Earthworm
 - changes in soil quality, 409
- Ecodistrict
 - Alberta's agricultural soil benchmark sites, 399
- Effluent irrigation
 - mill effluents on a coarse-textured Brunisol, 429
- Electrical conductivity
 - environmental losses of nitrogen in potato production, 813
 - mill effluents on a coarse-textured Brunisol, 429
- Elution
 - inorganic and organic P elution from soil columns, 709
- Energy level
 - X-ray computed tomography in soil science, 1
- Erosion
 - changes in soil quality, 409
 - critical organic carbon content, 775
 - effect of preceding crop on yield and soil properties, 553
 - mercury and soil erosion: a molecular biomarker approach, 801
 - soil erosion, 365
- Extraction shaking time
 - time and measurement methods influence soil tests, 733
- Fallow
 - carbon sequestration in Canadian ecoregions using ICBM, 451
- Feedlot
 - changes during feedlot manure composting, 45

- Fertility, soil
 nutrient budgets of organic dairy farms, 107
- Fertilizer nitrogen
 fertilizer nitrogen effects on N_2O emissions, 229
 manure and fertilizer nitrogen application rates, 619
 N mineralization in Canadian prairies, 681
 nitrous oxide emissions and soil mineral nitrogen status, 145
- Fertilizer N recommendations
 Illinois soil nitrogen test and spring wheat yield, 837
- Festuca arundinacea* Schreb.
 nitrous oxide from dairy slurry, 517
- Flooded soil
 N mineralization in paddy soils of China, 719
- Flux chamber
 emissions from irrigated cropping systems, 207
- Flux tower
 spring thaw and growing season N_2O emissions, 241
- Forage
 assessing organic potato cropping systems, 543
- Forage, seeded perennial
 soil resistance under grazed intermediate wheatgrass, 833
- Forest floor
 bigleaf maple influence on forest floor, 295
- Forest soil
 carbon, organic matter and bulk density relationships, 315
 stratifying soils for soil C modeling, 501
- Gas emission, biogenic
 tillage effects on N_2O emission, 153
- Genesis
 stratifying soils for soil C modeling, 501
- Germination index
 evaluation of clam shells as liming material, 559
- Global warming
 carbon dynamics in arctic soils, 31
 climate change impacts on grazing capacity, 595
 emissions from irrigated cropping systems, 207
- modelling N leaching under climate change, 61
- Glucose
 soil aeration, nitrate and carbon effects on N_2O emissions, 133
- Grass
 carbon dioxide emissions by urban turfgrass areas, 529
- Grass, native
 runoff response of native and introduced grasses, 337
- Grassland
 climate change impacts on grazing capacity, 595
- Greenhouse gas
 Canadian dairy and industry GHG emission trends, 629
 carbon dioxide emissions by urban turfgrass areas, 529
 emissions from irrigated cropping systems, 207
 inventory of soil N_2O emissions in Canada, 655
 models to estimate N_2O emissions in Eastern Canada, 251
 N_2O fluxes, 175
 soil N_2O emissions in Canada, 641
- Gross mineralization
 N dynamics in boreal peatlands, 697
- Ground cover
 runoff response of native and introduced grasses, 337
- Herbage
 nitrous oxide from dairy slurry, 517
- Heterotrophic respiration
 soil respiration components in poplar plantations, 261
- High-resolution maps
 model prediction of soil drainage classes, 787
- Hog manure
 ammonia volatilization following application of pig slurry, 585
 inorganic and organic P elution from soil columns, 709
- Hog slurry
 nitrous oxide emissions and soil mineral nitrogen status, 145
- Hordeum vulgare*
 nitrous oxide emissions from barley, 197
- Humic fraction
 distribution of C in soil humic fractions as affected by tillage, 99
- Hybrid poplar
 mill effluents on a coarse-textured Brunisol, 429
 soil respiration components in poplar plantations, 261
- Hydraulic conductivity
 changes in soil quality, 409
 silvicultural thinning changes soil physical properties, 849
 tillage and crop rotation on soil properties, 273
- Hydrology model
 model prediction of soil drainage classes, 787
- Hydro-physical properties of soil
 X-ray computed tomography in soil science, 1
- Illinois soil nitrogen test
 Illinois soil nitrogen test and spring wheat yield, 837
- Intensity indicator
 Canadian dairy and industry GHG emission trends, 629
- Inventory
 inventory of soil N_2O emissions in Canada, 655
 soil N_2O emissions in Canada, 641
- Irrigation
 N mineralization in Canadian prairies, 681
- Isotope, stable
 carbon dynamics in arctic soils, 31
- Lake St. Pierre
 mercury and soil erosion: a molecular biomarker approach, 801
- Landscape
 Alberta's agricultural soil benchmark sites, 399
 qualitative soil-landscape effects on a bromide tracer, 477
 quantitative soil-landscape effects on a bromide tracer, 491
- Lawn
 carbon dioxide emissions by urban turfgrass areas, 529
- Leaching
 seasonal nitrate levels in the soil solution, 423
 vertical bromide redistribution in hummocky landscape, 349

- Legume**
spring thaw and growing season N_2O emissions, 241
- Lignin biomarkers**
mercury and soil erosion: a molecular biomarker approach, 801
- Liming**
evaluation of clam shells as liming material, 559
- Liquid hog manure**
ammonia volatilization following application of pig slurry, 585
- Litter**
runoff response of native and introduced grasses, 337
- Livestock system**
assessing organic potato cropping systems, 543
- Local indicators of spatial association**
bigleaf maple influence on forest floor, 295
- Loess plateau**
relative weight model for soil productivity assessment, 827
- Lysimeter**
environmental losses of nitrogen in potato production, 813
- Maize**
 N_2O fluxes, 175
- Management strategies**
nitrous oxide and odour reduction from swine manure, 571
- Manure**
ammonia emission from dairy cow manure, 611
ammonia volatilization following application of pig slurry, 585
changes during feedlot manure composting, 45
inorganic and organic P elution from soil columns, 709
manure and fertilizer nitrogen application rates, 619
 N_2O fluxes, 175
nitrous oxide and odour reduction from swine manure, 571
phosphorus loading in manured Saskatchewan soils, 377
spring thaw and growing season N_2O emissions, 241
- Manure, composted cattle**
organic carbon in a sandy-loam soil, 443
- Manure nitrogen**
manure and fertilizer nitrogen application rates, 619
- Mean error of prediction**
use of in situ volumetric water content at field capacity, 533
- Mercury**
mercury and soil erosion: a molecular biomarker approach, 801
- Methane**
emissions from irrigated cropping systems, 207
- Microbial biomass**
N dynamics in boreal peatlands, 697
tillage, P fertilization and soil microbial biomass, 21

field capacity and permanent
wilting estimation, 761
- pH, soil
evaluation of clam shells as liming
material, 559
- Phosphorus
evaluation of P retention
equations, 327
nutrient budgets of organic dairy
farms, 107
phosphorus loading in manured
Saskatchewan soils, 377
- Phosphorus dynamics, soil
mycorrhizae on soil P
dynamics and corn P
nutrition, 283
- Phosphorus fertilization
tillage, P fertilization and soil
microbial biomass, 21
- Phosphorus, inorganic/organic
inorganic and organic P elution
from soil columns, 709
- Phosphorus nutrition
mycorrhizae on soil P
dynamics and corn P
nutrition, 283
- Phosphorus retention
evaluation of P retention
equations, 327
- Phosphorus sorption
evaluation of P retention
equations, 327
- Physical properties, soil
effect of preceding crop on
yield and soil properties, 553
silvicultural thinning changes
soil physical properties, 849
X-ray computed tomography
in soil science, 1
- Pig slurry
ammonia volatilization following
application of pig slurry, 585
- Plant-available nitrogen
N mineralization in Canadian
prairies, 681
organic carbon in a sandy-loam
soil, 443
- Plant-soil interactions
bigleaf maple influence on forest
floor, 295
- Poplar, hybrid
mill effluents on a coarse-textured
Brunisol, 429
soil respiration components in
poplar plantations, 261
- Potassium
nutrient budgets of organic dairy
farms, 107
- Potato
assessing organic potato cropping
systems, 543
effect of preceding crop on yield
and soil properties, 553
environmental losses of nitrogen
in potato production, 813
- Prairie
climate change impacts on grazing
capacity, 595
- Precipitation deficit
water conservation in the semiarid
prairie, 461
- Principal component analysis
assessing organic potato cropping
systems, 543

- Process-based model
models to estimate N_2O emissions
in Eastern Canada, 251
- Productivity index, soil
relative weight model for soil
productivity assessment, 827
- Productivity loss
SimPLE.ca, 365
- Red clover
effect of preceding crop on yield
and soil properties, 553
soil aeration, nitrate and carbon
effects on N_2O emissions, 133
- Relative weight
relative weight model for soil
productivity assessment, 827
- Residual soil nitrogen
modelling N leaching under
climate change, 61
- Respiration, soil
emissions from corn, soybean
and wheat, 163
- Ridge-tillage
mycorrhizae on soil P
dynamics and corn P
nutrition, 283
- Root exclusion
soil respiration components in
poplar plantations, 261
- Root mean square error
use of in situ volumetric water
content at field capacity, 533
- Rotation
emissions from corn, soybean
and wheat, 163
- Runoff
changes in soil quality, 409
- Saturation ratio
critical organic carbon
content, 775
- Seeded perennial forages
soil resistance under grazed
intermediate wheatgrass, 833
- Segmentation
X-ray computed tomography
in soil science, 1
- Simulation modeling
N mineralization in paddy soils
of China, 719
- Simulator
SimPLE.ca, 365
- Slaking
mechanisms of aggregate slaking
process during rapid wetting, 85
- Snowmelt
spring thaw and growing
season N_2O emissions, 241
- Sodium adsorption ratio
mill effluents on a coarse-textured
Brunisol, 429
- Soil, seasonally flooded
N mineralization in paddy soils
of China, 719
- Soil test phosphorus
phosphorus loading in manured
Saskatchewan soils, 377
- Soil Landscapes of Canada
manure and fertilizer nitrogen
application rates, 619
- Soil mineral and organic constituents
X-ray computed tomography in
soil science, 1
- Soil water
water conservation in the semiarid
prairie, 461
- Soil pH
evaluation of clam shells as liming
material, 559
- Soil testing
time and measurement methods
influence soil tests, 733
- Soil quality
changes in soil quality, 409
- Soil profile index
vertical bromide redistribution
in hummocky landscape, 349
- Solute redistribution
qualitative soil-landscape effects
on a bromide tracer, 477
quantitative soil-landscape effects
on a bromide tracer, 491
- Soybean
tillage effects on N_2O
emission, 153
- Spatial analysis
bigleaf maple influence on forest
floor, 295
- Spatial resolution
X-ray computed tomography
in soil science, 1
- Spatial variability
critical organic carbon
content, 775
- Standard deviation of prediction
use of in situ volumetric water
content at field capacity, 533
- Suction lysimeter
environmental losses of nitrogen
in potato production, 813
- Surface charge
cation binding in agricultural
soil, 749
- Swelling
mechanisms of aggregate slaking
process during rapid wetting, 85
- Temperature
seasonal nitrate levels in the
soil solution, 423
- Terminal electron acceptor
fertilizer nitrogen effects on
 N_2O emissions, 229
- Texture
field capacity and permanent
wilting estimation, 761
use of in situ volumetric water
content at field capacity, 533
- Tillage
Canada carbon change
factors, 671
distribution of C in soil humic
fractions as affected by tillage, 99
N mineralization in Canadian
prairies, 681
tillage and crop rotation on soil
properties, 273
tillage effects on N_2O
emission, 153
tillage, P fertilization and soil
microbial biomass, 21
- Tillage, conservation
tillage, P fertilization and
soil microbial biomass, 21
- Tillage, conventional
tillage, P fertilization and
soil microbial biomass, 21
- Tillage practices
distribution of C in soil humic
fractions as affected by tillage, 99
